Vivo Biosciences Inc.

Accelerating Preclinical Research & Drug Discovery
Through 3D Human Bioassay Technology

New Human Biomatrix Culture System

Properties	Novelty of HuBiogel™
Source:	Human tissues
ECM nature:	Physiological (Natural)
Key Components:	Col-I (35%), Laminin (25%), Col-IV (20%), Col-III (7%), Entactin & HSPG (< 3%)
GFs/ Proteases:	Undetectable (non-immune)
Unique Biology:	Controlled cell proliferation & differentiation

(World-wide patents filed, pending)

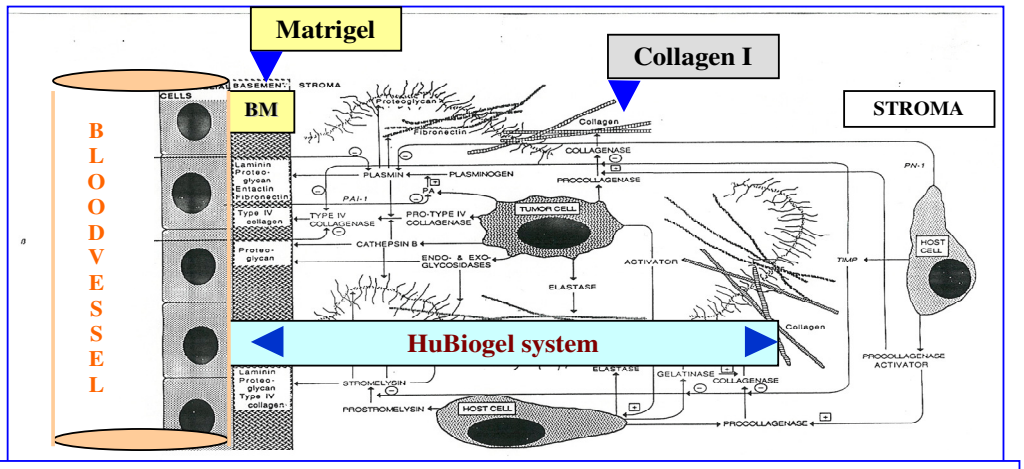
Major Advantages of HuBiogel™

Human biomatrix with native, defined composition

(GF-free, Non-immune)

Supports long-term culture & function of many cell types

(Mimics tissue-like microenvironment & function)



A physiologically-relevant biomatrix environment

Products: HuBiogel™ Culture Kits
Services: 3D HuBiogel™ Assay Systems
