

Vivo Biosciences Inc.

*Accelerating Preclinical Research & Drug Discovery
Through 3D Human Bioassay Technology*

Multiple 3D HuBiogel Assay Models

- Replicate normal & disease tissue biology with HG-scaffolds
- Developed 3D Oncology assay platform (NCI-60 Screens)
- Tissue-like models possible with stem cells & primary cultures

New R&D programs in progress:

- **3D Liver, Islets, Vascular and Skin culture systems**
- **Bioactive scaffolds for tissue regeneration (stem cells)**
- **Biologic & genomic profiling of patient-derived samples**

Products: 2D HuBiogel™ culture reagents (LD-HG)

Services: 3D HuBiogel™ assay models (HD-HG)
