

# Vivo Biosciences Inc.

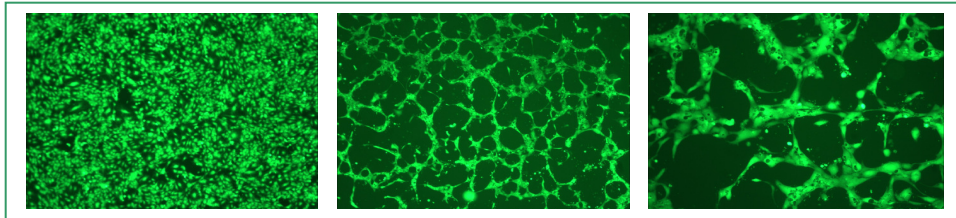

*Accelerating Preclinical Research & Drug Discovery*

*Through 3D Human Bioassay Technology*

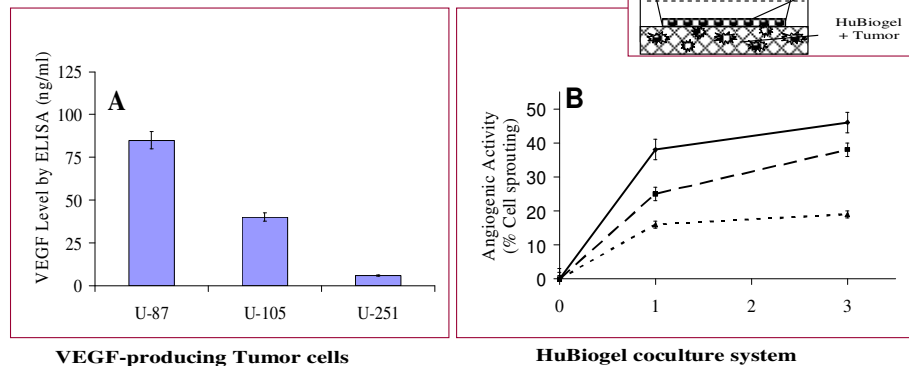

## HuBiogel-AngioStart™ Assay

- GF-enriched HuBiogel allows controlled cell differentiation
- Angio-Start kits for 1 to 5 day HUVEC morphogenesis
- Tumor angiogenesis is replicated via co-culture assays

### Real-time FGF-Induced Angiogenesis Analysis

### Tumor Angiogenesis Profiling:

- **Both pro- & anti-angiogenic agents can be identified**
- **Vascular endothelial flow model for tumor metastasis**
- **High-value utility for wound healing & BBB assay models**

**Products:** HuBiogel™ Culture Kits

**Services:** 3D HuBiogel™ Assay Systems
